

## SAFETYRAIL 2000 FIBER GLASS GUARDRAIL SYSTEM

### Description

BlueWater Manufacturing's newest guardrail system, SafetyRail 2000FG, is constructed out of fiberglass. The FG Safety Rail (patent-pending) is the ideal passive fall protection system for rooftop fall protection when telecommunication equipment is present and can't have metal guardrails that will interfere with RF signals. This RF-transparent guardrail is non-penetrating and can be used as a portable or permanent fall protection system.

### Basic Use

The rail sections of the SafetyRail 2000FG can be mounted in infinite directions, enabling endless configurations and fast and easy installation. They are made from a polyester, fire retardant, UV inhibited and a UV coated material.

### Features

- ▶ No holes need to be drilled
- ▶ 100% portable
- ▶ Meets and Exceeds OSHA Regulations for Fall Protection
- ▶ Install over 250 feet in an hour with two men
- ▶ Rails can be positioned in infinite directions
- ▶ Each base can support up to 4 rails
- ▶ Custom engineering / manufacturing for special requirements
- ▶ Rails made from polyester, fire retardant, UV inhibited and UV coated material
